Operations Management

PROFESSIONAL EXPERIENCE

Macista Limited Kenya

Lead Developer

July 2025 - September 2025

Coordinated , Designed and Developed the company website from scratch using the MERN architecture alongside other developers who also contributed to the success of the website that was delivered in 8 weeks time

Accomplishments:

- Ensured that the website was interactive on all devices .
- Fast and optimal code was written enabling the website to run as fast as possible with minimal errors .
- Enhanced the websites security by use of JWT and bcrypt.js , thus making sure there was no leakage of user's information.
- Improved company's sales by 30% by creatively displaying the company's services and products using modern and clean UI.
- Improved company's visibility through thorough SEO.

BrewHaven USA

Freelance Gig

October 2025 - November 2025

Developed the business e-commerce website for selling coffee products online and also in person , usign the MERN architecture alongside APIs such as spline to enable universal payments .

Accomplishments:

- Improved company profits by 10% and is still rising with time.
- Improved the UI /UX of the website thus creating base for enhanced customer satisfaction.
- Elevated the company's public presence due to proper SEO and advertising.
- Saved alot of time for the management due to automatic AI responses for user queries and FAQs.

My own enterprenurial firm that deals with developing webites or web apps for businesses , Search engine optimisation and also consultation .

Accomplishments:

- Helped businesses troubleshoot problems in their initially exsisting websites and applications.
- Designed and Developed full stack websites for companies from scratch using the MERN architecture through writing clean and logical code.
- Helped businesses with insights on the best hosting platforms that suit their businesses and also following up to make sure that they are actually able to find suitable and efficient solutions.
- Created several SaaS projects such as protiba (<https://protiba.onrender.com/>) , a full stack web application I had created to automatically generate timetables for schools with the help of AI .
- Hosted several webinars to teach new techies the basics of web development for free .
- Created the kenya schools API , which is a resful API consisting of all the schools in Kenya and Tanzania that I managed to sell .
- Volunteered to create for my sister an e-commerce website to showcase her business products to the public .
